Stand-Alone and Bulk Systems

KSi Applicator

The Next Generation in Seed Treatment Application

KSi Conveyors Inc. – a leader in seed handling and seed treatment applications – introduces the KSi 4808NGA Seed Applicator, the most advanced and accurate seed treatment technology and equipment in the industry. The Patent-Pending KSi Applicator features numerous technological advances and design elements that address the most common challenges in the seed treatment industry today.

Our customers look to us to provide the best in seed handling, seed treatment, and process automation, and the KSi Applicator is the latest step in providing the value and service they've come to expect from us. The 4808NGA brings KSi's industry-leading equipment and automation expertise together, ushering in the next generation in seed treatment application.

The KSi Applicator's new equipment and hardware design elements leverage established KSi software and process automation innovations to simultaneously control seed flow and chemical flow rates, producing the most accurate chemical application available.

- Accurate chemical application for uniform seed coating
- Advanced mixing and conditioning for optimum plant-ability and appearance
- KSi Automation technology integration

Availability and Lead Times

- Limited Production and Availability for 2014 Season
