HMI with Mounting Arm

Bringing Together Industrial-Level Control with PC-Based Usability and Convenience

The KSi Automation v4 system retains its reputation as the most robust and accurate system available in the marketplace, then takes a technological leap forward by integrating the latest in PC-based software capabilities and functionality. Combined with convenient HMI hardware upgrades, the resulting system offers the most user-friendly and flexible system in the industry.

- Simple, intuitive order entry and screen navigation
- Versatility in office environment/reporting, web access, .pdf and video viewing (for on-demand/on-site training, for example), scalability, compatibility with Windows-based hardware options
- System retains industrial hardware (PLC) setup from previous versions
- HMI panel can be separated from the control panel enclosures and mounted on wall/desk/mobile cart — 19-in touch-screen panel with universal mount for arm/stand/bracket/etc. with power cord (110v) and Ethernet cable (shielded from power cord)
- Compatible with numerous brands of equipment and mechanical configurations

Availability and Lead Times

- Available for new systems — Spring 2014 Season
- Applies to KSi AutoTreat and KSi AutoBatch systems.
