

# ALL CLEARED FOR VEGETABLE SEEDS

**5x  
NEW**

## INCOTEC'S NEW RANGE OF MICROPLASTIC-FREE FILM COATS FOR VEGETABLES

**incotec**

the seed enhancement company

Part of Croda International Plc

### Stay one step ahead

In the agricultural sector it can be challenging to abide by regulations and still provide a top-end product for your customers. To help you stay ahead of legislative changes soon to be imposed in Europe, we have developed a new line of microplastic-free seed coatings that deliver high-quality results. Part of this new range is our series of vibrantly coloured new Disco film coats for vegetables.

These new microplastic-free products offer you excellent quality with dust levels that are kept to a minimum - key parameter of a quality coating.

The charts show how the film coats perform against microplastic-containing film coats.

Figure 1: Heubach Dust-off Carrot

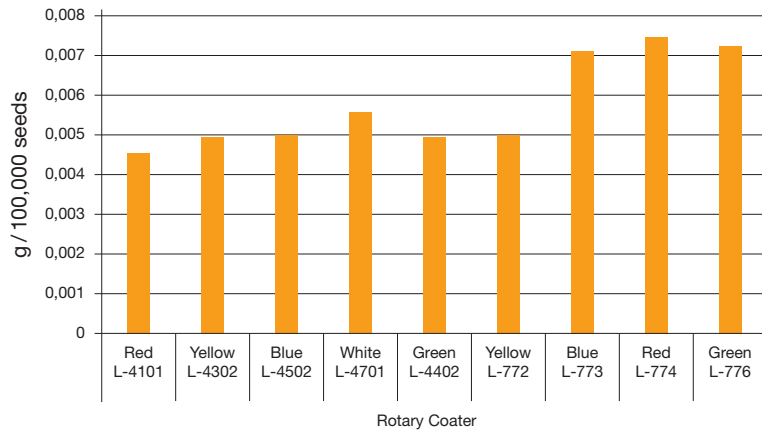

Figure 1 results show the new Microplastic-free film coats perform even better on dust-off than the current Disco Advanced line. Even far below the current ESTA dust off reference of 0.1 g dust/100,000 seeds for carrot seeds.

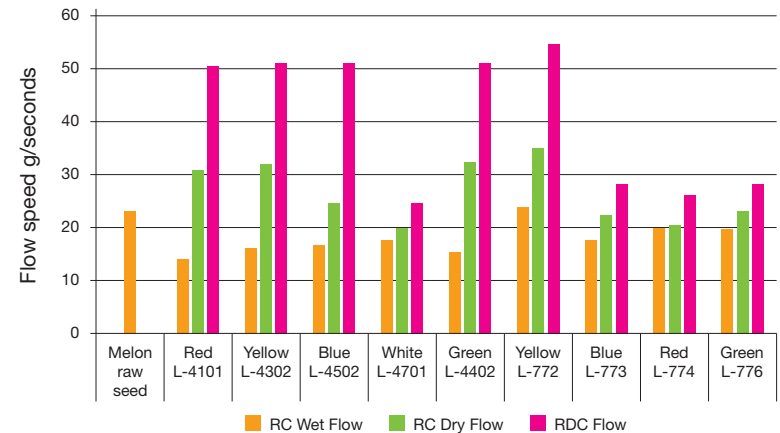

Also on flowability we see an excellent performance in figure 2; Flowability on melon seeds.

### All you could want ...and more

Excellent dust control is just one of the first-class properties of these new microplastic-free products for vegetable seeds. Easy application is another, no matter which type of equipment is used. The performance results like germination and flowability are validated in customer trials and match the performance of any conventional film coats.

Both adherence as well as cosmetics are of proven high quality making these products suitable for a wide range of differently sized and diversely coloured vegetable seeds. And to enable use in different regions around the world, they are both REACH and EPA compliant, making it easier for you to use our products regardless of where you want the seed treated and shipped.

Figure 2: Flowability MPF film coated Melon seeds

- Microplastic-free
- Excellent dust control
- Vibrant colours
- Validated on Rotary Coater (RC) and Rotary Dry Coater (RDC)
- Suitable for a wide variety of vegetable crops
- Compatible with commonly used Plant Protection Products (PPPs)
- REACH and EPA compliant
