

NEW!

Automated Loss in Weight System

for our Bulk Treating & Coating Systems

- ✓ Consistently Accurate
- ✓ No More Meters or Measuring Vessels
- ✓ Constantly Monitors System Flow & Application

Available for:

GTS 10 Bulk Seed Treating System

3150 CCS Rotary Coating System

Universal Coating Systems introduces ALWS (Automated Loss in Weight System) to both our CCS Rotary and GTS Bulk Treating Equipment.

Our computer controlled ALWS adds everything by weight, keeping the process consistently accurate. No more meters or measuring vessels!

ALWS also has the built in feature of constantly monitoring system flow and application. If the system does not make weight within the operation window, ALWS will shut down the process and activate an alarm.

For a more detailed description of ALWS contact us today!
